

NEW!

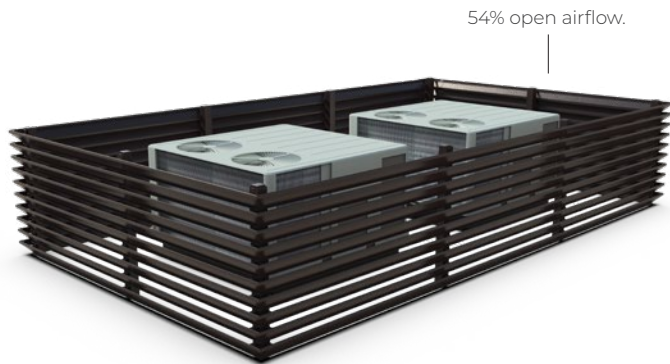

ENVISOR[®] Z-FIN

ROOFTOP & GROUND SCREENING

Engineered with 6" louvers providing 54% open airflow, the system can be engineered to withstand wind loads up to 180 mph. Envisor[®] Z-Fin conceals rooftop equipment while maintaining ventilation, letting the units breathe, not bake. The modular Z-Fin system can be used for both roof and ground screening and scales easily to accommodate large mechanical equipment, making it an ideal solution for data centers, warehouses, and apartment complexes.

ENGINEERED AND MANUFACTURED TO ADAPT TO YOUR SPECS
