

## CITYSCAPES<sup>®</sup> HAMMOCK SYSTEMS

Hammocks that do more than just hang around.

An integrated modular hammock system built for the outdoors. Engineered to withstand the elements with durable weather-resistant materials and minimal maintenance. Create comfortable, intentional spaces anywhere. Unwind, recharge, and stay longer.

Design-forward by nature.

We're an architectural products manufacturer. We design with precision and obsess over proportions, finishes, materials, and integration—so the hammock system complements the surrounding architecture instead of fighting it.

Customize your calm.

Custom-built form, finish, and branding to match the place it lives.

- Flexible configurations
- Integrated lighting
- Optional shade elements

Engineered and manufactured to adapt to your needs.

A freestanding hammock support system designed for any environment.

- High performance, low maintenance
- Durable engineered steel frame for longevity
- Commercial-grade hardware
